

DOCKET NO: SCP-IDJ-12466

SUBJECT: Mobile Task Force Kappa-16

Independent Department of Justice

IDJ EVIDENCE EXHIBIT: SCPIDJK16-00951

LOG TYPE: Personnel Compromise Report // Unauthorized Chemical Suppression

ASSOCIATED CASE: Non-Sanctioned Memory Erasure of Foundation Research Staff

DATE OF ENTRY: [REDACTED]

EXECUTIVE SUMMARY OF VIOLATION A high-priority internal audit at **Site-81** has identified a critical breach of the Foundation's directives. Stationary Task Force Kappa-16 ("Sentinels") is suspected of utilizing specialized [REDACTED] gear to bypass security nodes and forcibly administer Class-C amnestics with an addition of sedatives to the **Senior Scientist** [REDACTED]. This action directly correlates with the victim's findings regarding [REDACTED] and [REDACTED] within the EZ.

UNAUTHORIZED PHARMACEUTICAL REQUISITION On the night of the incident, at approximately [REDACTED], a K-16 tactical medic utilized a **"Level 4 Key"** to access the Site-81 Medical Wing. Forensic analysis of the terminal logs shows the withdrawal of:

- [REDACTED] **Units** of Class-C amnestics
- [REDACTED] mg of Experimental Sedative **S-[REDACTED]**.

INCIDENT RECONSTRUCTION & OBFUSCATION Intelligence suggests the affected Scientist was intercepted while attempting to upload a "[REDACTED]" to the Site-81's database. In addition, the surveillance footage of where the incident happened has been corrupted. Physical evidence was NOT recovered from the scene which likely included a discarded **auto-injector** containing trace amounts of the amnestics used. The victim was subjected to a "stacked dosage" intended to not only erase the previous four hours of memory but to induce permanent **Cognitive scarring** regarding the specific events involving [REDACTED].

NEUROLOGICAL IMPACT & ASSET DEVALUATION The Scientist was recovered by the Security Department at [REDACTED] hours in a state of advanced catatonia. Post-incident medical evaluation confirms that the unauthorized application of Class-C chemicals has resulted in the total loss of [REDACTED] % of the subject's long-term memory, including sensitive information regarding SCP-[REDACTED]. The IDJ notes that this loss of Foundation intellectual property is a direct result of K-16's actions.

COMMAND COLLUSION Kappa-16 Command has officially categorized the incident as a **"Standard Occupational Exposure."** They claim the Scientist was accidentally caught in a [REDACTED] leak. The actions done by K-16 are seen as unethical, due to not only the unauthorized use of amnestics and sedatives, but mainly to the excessive use of them, which led to permanent, neurological damage to the researcher.
